Professional Summary

Flutter Developer with 1.5+ year of experience building and deploying scalable cross-platform mobile applications, including published apps on Google Play. Skilled in Flutter, Dart, Firebase, REST APIs, and state management (Provider/BLoC), with hands-on experience developing marketplace, ride-sharing, booking, and subscription-based platforms. Strong focus on performance optimization (25% faster load time), smooth 60 FPS UI animations, and maintaining 95% crash-free stability. Possess solid understanding of secure coding practices, real-time features, payment integration, and location-based services. Passionate about building high-performance, user-centric mobile products.

Education

Poornima College of Engineering , Jaipur BTech in Cyber Security	2025
Marwar International Academy , Makrana Higher Secondary Certificate (HSC), 75.86%	2021

Technical Skills

Languages & Frameworks: Flutter, Dart, Firebase (Cloud Firestore, Firebase Authentication, Firebase Cloud Messaging), REST APIs, Supabase

State Management: Provider, BLoC

Tools: Android Studio, VS Code, Git/GitHub, Postman, Figma, Rive, Lottie Editor, Google Play Console, Apple Store Connect

Architecture: MVVM, Clean Architecture, Modular Architecture, MVC

Specialization: UI/UX Animations, App Performance Optimization, Payment Gateway Integration, Google Maps API Integration, Real-time Features (Chat & Notifications), Secure APIs

Experience

Gohashinclud — Flutter Developer Nov 2024 – Present | Jaipur

- Developed and deployed 5+ cross-platform mobile applications using Flutter & Dart, following Clean Architecture and modular development principles.
- Implemented state management (Provider/BLoC), optimized API integration, and applied local caching & lazy loading techniques to improve app load time by 25%.
- Integrated Firebase Cloud Messaging (push notifications), payment gateways, and Google Maps API for real-time and location-based features.
- Built responsive UI with smooth 60 FPS animations, improving user engagement and overall app performance.
- Collaborated with cross-functional teams to ensure seamless API communication and maintain 95% crash-free stability in production environments.

Projects

Beavr Lifestyle — Published on Google Play

Developed and deployed a production-level lifestyle application with optimized API handling, Firebase push notifications, and smooth UI animations for enhanced user experience.

Tech Stack: Flutter, Dart, Firebase, REST APIs, Supabase, Custom Painter, Rive animations, Lottie Animation

Attendora — Attendance Management App (Published on Google Play)

Developed a smart attendance tracking system with role-based access, real-time attendance logging, reporting features, and automated notifications.

Tech Stack: Flutter, Dart, Firebase, Firestore Database, Razor pay

Fast2Book — Service Booking App (Published on Google Play)

Built an on-demand service booking platform allowing users to browse services, book appointments, and make secure payments with real-time status updates and notifications.

Tech Stack: Flutter, Dart, Firebase, Payment Gateway Integration

RideFizz — Ride Sharing Application

Developed a ride-sharing mobile app enabling users to post rides, search available routes, book seats, and communicate via in-app chat with rating and review system integration.

Tech Stack: Flutter, Dart, Firebase, Google Maps API

RideNTour — Ride Booking & Tour Package App

Built a mobility application combining real-time cab booking (like Uber/Ola) with tour package browsing and booking features, including fare calculation and secure payment processing.

Tech Stack: Flutter, Dart, Firebase, Google Maps API, Payment Gateway

Bhawani Fitness — Yoga & Wellness Subscription App

Developed a subscription-based fitness platform enabling users to purchase plans, receive onboarding calls, access daily live yoga sessions, track attendance, and receive personalized diet plans with push notification reminders.

Tech Stack: Flutter, Dart, Firebase, Payment Integration

RojAvasar — Labor Marketplace Application

Built a two-sided marketplace application connecting service providers with customers through location-based job matching, in-app chat, wallet management, rating system, and secure authentication workflow.

Tech Stack: Flutter, Dart, Firebase, Google Maps API, Payment Integration

Bookzila — Flutter Application

Built a cross-platform book-selling application featuring categorized search, secure API integration, cart management, and order tracking system with responsive UI design.

Tech Stack: Flutter, Dart, Firebase, Razor Pay, Lottie animation

Amanti — Escrow Management System

Developed a secure escrow platform ensuring transparent and tamper-proof transactions between parties. Integrated secure REST APIs and implemented encryption techniques for data protection and safe transaction flow.

Tech Stack: Flutter, Dart, Firebase, REST APIs

Mini Projects & Animated UI Experiments

- **Animated Screens Collection — Flutter**
Designed 6+ micro-animations to demonstrate creative UI transitions.
 - Focused on optimizing widget rebuilds and maintaining 60 FPS animation performance.
 - Showcases advanced animation controllers and state synchronization.
- **Onboarding Flow (Hero Animations)**
Built a multi-step onboarding system with Hero transitions and smooth fade-in effects for app branding experiences.

Certifications

Certified in Cybersecurity (CC), ISC ²	Jan 2025
Validated knowledge of network defence, incident response, and access controls.	
Introduction to Critical Infrastructure Protection (ICIP), OPSWAT Academy	Oct 2024
Google Cybersecurity Professional Certificate, Coursera	2024
(Foundations of Cybersecurity, Risk Management, Network Security, Linux & SQL)	
Cybersecurity Job Simulation, Forage	2023
Designed phishing simulations and analysed results for risk assessment.	
Seminar on Tackling Cyber Crime, Rajasthan Police & CII	Apr 2023

Achievements

- Secured 2nd place among 20 teams in a Robotic Car Race Tournament (2021).
- Represented district in State-Level Kabaddi Tournaments (2019).
